V5 Semiconductors

Strengthening Our Product Portfolio by Partnering with Niche OEMs!

We are thrilled to announce that we have teamed up with Apacer Technology Inc., a world-leading designer, manufacturer of digital storage solutions and NKK Switches, a designer and manufacturer of high quality and reliable electromechanical switches. The new partnerships aim at providing our customers an option to choose from a wide range of electronic components from world class OEMs.

Apacer Technology

Apacer Technology is a Taiwan-based multinational corporation that designs, manufactures and markets consumer electronics, memory modules and digital storage hardware and software. It is a leading global supplier of solid-state drives (SSD) and consumer digital products. Apacer is the first in the world to introduce 2.5" SATA RAID Flash Drive (SRFD) that can increase data reliability and security. Its product lines include:

- SSD
- DRAM
- SATA/PATA
- Colormeter
- CAN Bus Card
- Spectroradio-meter

NKK Switches

NKK Switches is a leading designer and manufacturer of electromechanical switches. Based in Japan's Kawasaki, it produces the industry's most extensive selection of electromechanical switches and sets the standard for quality, stability and reliability in switches. NKK makes its products available worldwide through its branch offices in the US, Germany, China, Hong Kong and Philippines and an extensive network of distributors and sales representatives. It designs and manufactures a wide array of switches including:

- Toggle Switches
- Illuminated Toggle Switches
- Rocker Switches
- Push-button Switches
- Programmable Switches
- Smart Switches
